

Junior Business Analyst for Business Development and Commercialization at UNION therapeutics

Are you looking to **build your analytical toolbox** while working in the **fast-paced and international environment of a growing biotech company**?

Then join us at UNION therapeutics as a **Junior Business Analyst in our Business Development and Commercialization** team in our headquarters in Tuborg Havn, Hellerup.

UNION is a privately held, clinical stage, pharmaceutical company dedicated to the development of novel medicines for immunodermatology and infectious diseases. The UNION team currently consists of ~30 people with different backgrounds spanning clinical operations to production and commercialization.

Becoming part of our Business Development and Commercial team, you will work together with skilled and dedicated colleagues on various projects along the commercial value chain. Reporting to the Director of Business Development, the Junior Business Analyst **conducts research and analyses and supports the BD and Commercial team** on projects and ad hoc tasks related to **market research, competitive intelligence, partnerships dialogues, and commercial planning**. As a Junior Business Analyst, you will be required to work 15-20 hours per week.

Your responsibilities include:

- Support market research by analyzing and synthesizing complex information from primary and secondary market research projects
- Develop evidence-based forecasts and recommendations to support business decisions
- Analyze survey data and develop presentations to communicate the results
- Collect and synthesize competitive intelligence information
- Support KOL engagement activities, e.g., ad board planning
- Prepare information and communication to support partnership and investor dialogues
- Support BD and Commercial team members on ad hoc tasks and projects
- Duties in addition to what is described above should be expected

To succeed in the role, you:

- Are currently studying in your last year of your bachelor's degree or first year of your master's degree
- Have a strong analytical mindset and a structured approach to your work
- Possess strong skills with Microsoft Office, especially Power Point and Excel
- Are proactive and have a strong personal drive, enabling you to take initiative and deliver high-quality results
- Have gained first experience in/possess a strong interest in the pharma/biotech space
- Speak and write English fluently

For more information about the role, feel free to reach out to Eva Stensgaard, Director of Business Development at UNION therapeutics on eva.stensgaard@uniontherapeutics.com.

To apply for this position, email your motivation, resumé and grade transcript to Eva Stensgaard on eva.stensgaard@uniontherapeutics.com by April 23rd. We will be conducting interviews on a continuous basis.
